Stitching

200 Machines 200 Workers

Our advanced stitching facility is equipped with **200 Jack sewing machines** on the production floor and supported by a skilled workforce of **100 skilled and 100 semi-skilled** professionals.

Specialising in garment and sock linking operations. Our optimised production workflow ensures **precision stitching, superior finishing and high-volume output** while consistently meeting international quality standards and customer specifications.

checking

Checking

2-Layer System

Our dedicated Quality Control team follows a comprehensive **2-layer inspection system** to ensure every product meets the highest standards of quality and accuracy.

Layer 1 consists of **in-line inspections at every stage of production.**

Layer 2 involves **final AQL-standard inspections before dispatch.**

Every product is thoroughly evaluated for measurement accuracy, appearance, and packing to ensure **zero-compromise quality in every batch** and full compliance with customer specifications.
